

GENETIC ID NA, INC.

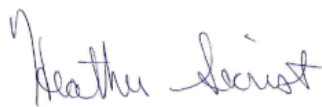

THE GLOBAL LEADER IN GMO IDENTIFICATION

Analitus Analises Biotecnologicas
Ecocerta Biotecnologia Ltda.
Rua Jose Aloysio Brugger, 1081
J. America 95050-150
Caxias do Sul – RS– Brazil

Analitus Analises Biotecnologicas has been granted membership in the Genetic ID Global Laboratory Alliance® (GLA), effective July 26, 2011. Admission to the GLA is based on successful completion of in-house training in Genetic ID Real Time PCR based GMO/Species analysis methods and satisfactory performance in Genetic ID's GLA QC Sample Program. The methods provided to GLA members are the result of extensive, in-depth research in the Genetic ID research laboratories and all of the methods have been accredited to ISO/IEC 17025, the international standard for laboratory accreditation.

GLA membership is evaluated annually and renewal is granted on the basis of consistent exemplary performance in Genetic ID's GLA QC program and maintenance of ISO 17025 accreditation.

The GLA provides uniform standards of excellence in GMO testing worldwide such that customers can be confident that GMO assessment of their products will be consistent, reliable, and based on the highest standards of science.
